

I've structured the entities and attributes like this:

Entities:

- > Attributes
- > Key in red

Enclosure:

- > Habitat type
- > Size
- > Main feature
- > Max number of animals
- > Unique number
- > animalID

Animal:

- > animalID
- > Enclosure unique number
- > Date at which animal was kept in enclosure
- > Date at which animal was removed from enclosure
- > Name
- > Date of birth
- > Diet
- > Description
- > Note
- > Compatibility species
